

Engineering2Empower

seeds an integrated process that empowers local entrepreneurs to deliver engineered urban housing in the open market within informal economies.

STRATEGY

Incubate

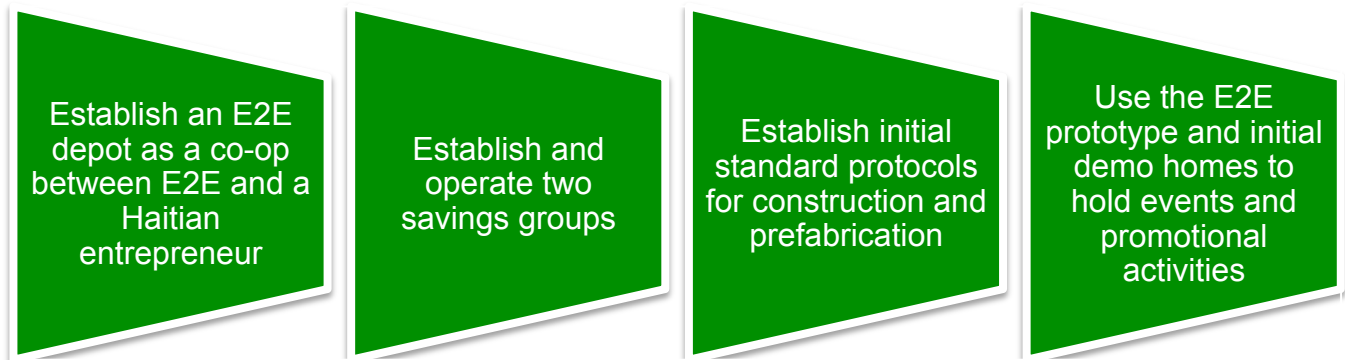

Prototype housing model to discover best practices and educate public about E2E model

Incubator I: Challenge and support Haitians to discover the best incentive structure for increased savings

Incubator II: Challenge and support Haitians to design the most efficient processes for prefabricating components

Incubator III: Challenge and support Haitians to craft most appealing doors, windows, and finishes

Seed

Scale
