

How do you rebuild **60,000 HOMES** every year for the next **10 YEARS** in Haiti?  
**1 HOME** at a time. **1 PARTNER** at a time. It begins here at **NOTRE DAME**.

“Piti, piti, wazo fe nich li.”

“Little by little the bird builds its nest.”

This Haitian proverb captures how homes were built in cities like Léogâne, epicenter of the 2010 earthquake.

Sadly, the thousands of families still living in shelters ever since that tragic day may never rebuild their homes, despite all their hard work and saving, unless someone brings a safe, affordable option into the marketplace.

That option is here and waiting for that one PARTNER ready to help it launch, ready to stand with E2E and the Haitian people. It begins with that one PARTNER who is ready to prove that it is time to change that proverb:

Little by little a **flock** of birds will help to build the nest!

The back of this card presents a few of the ways that can make **YOU** one of our **PARTNERS**.

In addition to general donations, E2E has 3 **PROGRAMS** that allow you to be a **PARTNER** who directly empowers the Haitian recovery...

**1 INNOVATION** at a time

**1 TOOL** at a time

**1 FAMILY** at a time

**E2E**

...It all begins here with **YOU!**
